Funds Available: yes \$25,000

Account name/number: Sewer Repairs/310-4359-435.45-20

Attachments: Ordinance Serial No. 20-14 (1 page)

Summary Statement: This ordinance is proposed to amend the FY2020 budget by appropriating \$25,000 from the sewer fund, fund balance for a new gas monitoring system at the wastewater treatment plant. This is a building wide system for the pre-treatment building where wastewater from pumping septic tanks is dumped and pre-treated prior to treatment in the digester. This is the original gas monitoring system from 2003 and the gas detectors are failing and can no longer be serviced. This system is designed to detect hazardous gases such as hydrogen sulfide, ammonia, methane, carbon monoxide, sulfur dioxide and nitrogen oxides that may leak into building spaces from wastewater treatment operations.

Proposed Action: Introduce and set the ordinance for public hearing.
